JOURNAL OF ELECTROANALYTICAL CHEMISTRY AND INTERFACIAL ELECTROCHEMISTRY, VOLUME 230 (1987)

SUBJECT INDEX

Activity coefficients,
——— for aqueous Na_2Succ solutions from EMF measurements (Esteso et al.) 69
Determination of ——— in aqueous solutions of trichloroacetic acid from EMF measurements at 25 °C (Esteso et al.) 77
Adiabatic electron transfer,
dynamics of ——— reactions at metal electrodes (Sebastian, Ananthapadmanabhan) 43
Adsorptive cathodic differential pulse stripping voltammetry,
determination of Captopril using ——— with the HMDE (Passamonti et al.) 99
Alkali-metal salts,
new aspects of the electrochemistry of heteropolyacids. Part III. Furhter proof of minimal solvation and ion pairing of silicotungstic and phosphotungstic species in acidic concentrated aqueous solutions of ——— (Keita, Nadjo) 267
Allyl-palladium,
cathodic behaviour of $[(\eta^3\text{-}C_3H_5)Pd(Ph_2P\text{-}C_2H_4\text{-}PPh_2)]^+$ in acetonitrile solution: an electrochemical process involving very fast consecutive chemical reactions (Daniele et al.) 165

Bond–Henderson–Oldham "global analysis",
determination of electrochemical kinetic parameters using the ——— (Anderson, Evans) 273

Captopril,
determination of ——— using adsorptive cathodic differential pulse stripping voltammetry with the HMDE (Passamonti et al.) 99
Carbon,
studies of the limiting currents associated with several oxidation reactions mediated by tris(2,2′-bipyridyl)iron(III) incorporated in Nafion films on ——— electrodes (Sharp) 109
Catechol,
nitrogen fixation. Part I. Electrochemical reduction of titanium compounds in the presence of ——— and N_2 in MeOH or THF (Becker et al.) 143
Chronoamperometric curves,
derivation of an approximate equation for ——— at microband electrodes and its experimental verification (Aoki et al.) 61

Double layer,
the ——— of single crystal gold electrodes in liquid and solid $HClO_4 \cdot 5.5\ H_2O$ (Hamelin et al.) 281

Electron transfer,
dynamics of adiabatic ——— reactions at metal electrodes (Sebastian, Ananthapadmanabhan) 43
Europium,
electrode processes of the V(III)/V(II) and ———(III)/Eu(II) systems in mixed water + acetone solvents (Kišová et al.) 155

Global analysis,
determination of electrochemical kinetic parameters using the Bond–Henderson–Oldham "———" (Anderson, Evans) 273
Gold,
the double layer of single crystal ——— electrodes in liquid and solid $HClO_4 \cdot 5.5\ H_2O$ (Hamelin et al.) 281

Hartree–Fock,
many-body effects in electrochemisorption. Part III. Beyond mean field and ——— (Mishra, Rangarajan) 1

Heteropolyacids,
new aspects of the electrochemistry of ———. Part III. Further proof of minimal solvation and ion pairing of silicotungstic and phosphotungstic species in acidic concentrated aqueous solutions of alkali-metal salts (Keita, Nadjo) 267
Heteropolyanions,
activation of electrode surfaces. Semiquantitative characterization of electrode surfaces modified with ——— (Keita et al.) 85
Hydrogen,
effect of methylviologen on the ——— evolution at mercury electrodes in aqueous buffer solutions (Tamamushi, Tanaka) 177

Inner layer,
silver–water interaction. Part I. Model of the ——— at the metal/water interface (Valette) 189
Iron,
electrolytic coating of titanium onto ——— and nickel electrodes in the molten LiF + NaF + KF eutectic (Robin et al.) 125

LiF + NaF + KF eutectic,
electrolytic coating of titanium onto iron and nickel electrodes in the molten ——— (Robin et al.) 125

Many-body effects,
——— in electrochemisorption. Part III. Beyond mean field and Hartree–Fock (Mishra, Rangarajan) 1
——— in electrochemisorption. Part IV. Multi-boson formalism (Mishra, Rangarajan) 23
Mercury,
condensed thymine films at the ———/water interface. Part V. Phase transitions (Sridharan, De Levie) 241
Effect of methylviologen on the hydrogen evolution at ——— electrodes in aqueous buffer solutions (Tamamushi, Tanaka) 177
Methylviologen,
effect of ——— on the hydrogen evolution at mercury electrodes in aqueous buffer solutions (Tamamushi, Tanaka) 177
Microband electrodes,
derivation of an approximate equation for chronoamperometric curves at ——— and its experimental verification (Aoki et al.) 61
Mixed adlattices,
lateral modification and organization of ——— on polycrystalline platinum electrodes (Zurawski et al.) 205
Multi-boson formalism,
many-body effects in electrochemisorption. Part IV. ——— (Mishra, Rangarajan) 23

Nafion,
studies of the limiting currents associated with several oxidation reactions mediated by tris(2,2′-bipyridyl)iron(III) incorporated in ——— films on carbon electrodes (Sharp) 109
Nickel,
electrolytic coating of titanium onto iron and ——— electrodes in the molten LiF + NaF + KF eutectic (Robin et al.) 125
Nitrogen,
——— fixation. Part I. Electrochemical reduction of titanium compounds in the presence of catechol and N_2 in MeOH or THF (Becker et al.) 143

Perchloric acid,
the double layer of single crystal gold electrodes in liquid and solid ——— · 5.5 H_2O (Hamelin et al.) 281
Phosphotungstic species,
new aspects of the electrochemistry of heteropolyacids. Part III. Further proof of minimal solvation and ion pairing of silicotungstic and ——— in acidic concentrated aqueous solutions of alkali-metal salts (Keita, Nadjo) 267
Platinum,
investigation of ruthenium deposition onto a platinized ——— electrode in sulfuric acid media (Szabó, Bakos) 233
Lateral modification and organization of mixed adlattices on polycrystalline ——— electrodes (Zurawski et al.) 205
Polypyrrole,
combined electrochemical and radiotracer study of anion sorption from aqueous solutions into ——— films (Inzelt, Horányi) 257

Ruthenium,
investigation of ——— deposition onto a platinized platinum electrode in sulfuric acid media (Szabó, Bakos) 233

Silicotungstic species,
new aspects of the electrochemistry of heteropolyacids. Part III. Further proof of minimal solvation and ion pairing of ——— and phosphotungstic species in acidic concentrated aqueous solutions of alkali-metal salts (Keita, Nadjo) 267
Silver,
———-water interactions. Part I. Model of the inner layer at the metal/water interface (Valette) 189
Single crystal electrodes,
the in-situ preparation of well-defined, ——— (Zurawski et al.) 221
Sodium succinate,
activity coefficients for aqueous ——— from EMF measurements (Esteso et al.) 69

Thymine,
condensed ——— films at the mercury/water interface. Part V. Phase transitions (Sridharan, De Levie) 241

Titanium,
electrolytic coating of ——— onto iron and nickel electrodes in the molten LiF + NaF + KF eutectic (Robin et al.) 125
Nitrogen fixation. Part I. Electrochemical reduction of ——— compounds in the presence of catechol and N_2 in MeOH or THF (Becker et al.) 143
Trichloroacetic acid,
determination of activity coefficients in aqueous solutions of ——— from EMF measurements at 25 °C (Esteso et al.) 77
Tris(2,2′-bipyridyl)iron(III),
studies of the limiting currents associated with several oxidation reactions mediated by ——— incorporated in Nafion films on carbon electrodes (Sharp) 109

Vanadium,
electrode processes of the ———(III)/V(II) and Eu(III)/Eu(II) systems in mixed water + acetone solvents (Kišová et al.) 155
